SGWU
ISSUES & EVENTS

Professor Jack Bordan, former Dean of Engineering, has been named Vice-Principal, Academic, of Sir George Williams University.

The appointment, effective June 1 for a period of five years, was made today by Dr. John W. O'Brien, Principal and Vice-Chancellor. It was made on the recommendation of a 14-member search committee, established in October 1969, representative of faculty, administration, students and Board of Governors.

Professors Bordan had been Acting Vice-Principal, Academic, since August 1969.

A native of Montreal, he holds B. Eng. (Engineering Physics) and M.Sc. (Physics) degrees from McGill University. He joined Sir George Williams in 1952 as Lecturer in Physics. He was made Professor of Engineering in 1962, becoming the University's first Dean of Engineering in 1963.

He was the Sir George Williams representative to the Gauthier Committee on provincial university operating budgets in 1969, and has served on the National Committee of Deans of Engineering & Applied Social Science of the Association of Universities and Colleges of Canada. He is a member of the American Society for Engineering Education, the Canadian Association of Physicists, and the Engineering Institute of Canada.

Prof. Jack Bordan, new Vice-Principal, Academic

first come first served. 3) Departmental priorities for certain students - e.g. those taking honours or majors.

In general, Ken Adams believes the new plan will satisfy most students going into their third or fourth. He also hopes it will alleviate conditions in our overcrowded second year.

When registration arrives, students who have passed all their courses this year will receive a complete package of course cards - providing their preferences can be met. Students who have failed a course may have any related new course removed from their package. Students who have failed their year will not be included. Courses taken in the summer will not affect the pre-registration procedure.

New timing priorities are also being established for registration in August and September. Evening undergraduates will be dealt with first, then day undergraduates. Partial students will be seen only after all the necessary course changes have been made for the evening undergraduates. Any former partial students will receive appointment cards on application. New partial students will receive appointment cards only when it is known for sure which courses are still open and which have been closed.

Adams hopes for at least 80% participation

Pre-Packaged Registration Starts Feb. 16

A major improvement in the registration procedure goes into effect at SGWU next week. It should enable most students to walk into registration in September and have an envelope waiting for them containing a package of cards covering all the courses they applied for.

The effectiveness of pre-packaged registration will be based on student response next week. The Registrar, Ken Adams, hopes that a good 80 percent of students will fill out pre-registration forms. The sooner the individual student fills out his own form, the better chance he will have of getting the courses he wants.

Pre-packaged registration is open to all day and evening students enrolled in undergraduate programs. But the expression of course preference will not be taken as a final commitment; changes can be made at registration. The University itself cannot make a final commitment

either. The 1970-71 budget has not yet been approved in Quebec, so departments do not yet know just how many courses they will be able to offer. For instance, a number of courses in the proposed 1970-71 curriculum are marked with asterisks to indicate that they are still tentative. Also, student demand may show a need for changes and additions which will depend in part on the necessary funds being made available.

Here is how pre-registration will work. Registration desks will be set up on the mezzanine of the Hall Building and in the Records Office in the Norris Building from Monday, February 16 to Friday, February 27. Day and evening students should study the course lists and fill out preference forms. The computer will then project course enrollments, and pre-package courses for individual students. The process allows for choice according

to course, not according to times.

From the computer print-outs the Registrar's office will know which student preferences have been met, and which could not be met, taking into account timetable conflicts. The Registrar will then discuss any problems with the departments concerned, for instance courses where there is over-registration or significant under-registration, as well as the possibility of changing or adding courses or increasing capacity.

Where it proves necessary, certain priorities will then be allocated. 1) Fourth year and third year students. University Council approved pre-registration for fourth and third year. It is also being applied so far as possible to second year and first year evening. First year day students will, as usual, be dealt with separately and receive their course packages on registration. 2) Priority of submission, or

NOTE:—Single section letters (i.e. "A") = day course; double letters = evening.
 —If a course number is followed by "DAY" and/or "EVE", enter on your form in place of section.
 —DAY STUDENTS MAY NOT SELECT EVENING COURSES UNLESS NOT OFFERED IN THE DAY.
 —An asterisk (*) designates a course tentatively offered.
 —Courses lettered XA, XXAA etc. have laboratories.

The theatre was named in honour of Douglass Burns Clarke last week. Congratulating Professor Clarke is Chancellor Fraser F. Fulton, while C. Alex Duff, Chairman of the Board of Governors, looks on.

Committees to study Grading and Explorations

At its meeting on Friday, February 6, the Arts Faculty Council established two ad hoc committees — one to study grading systems, the other to evaluate Explorations.

The committee on grading will consider the advisability of implementing a grade point average system. Michel Despland, Assistant Dean of Arts, said that an intensive search for all opinion on the matter would be sought. In addition to the G.P.A., the committee will consider a proposal from Assistant Professor Mark Braham. He recommends further opportunities for students to do acceptable work, with those requiring more time than the established course length to reach the necessary levels of competency being given an "in progress" grade.

A subcommittee to evaluate Explorations will look for both a coordinator and faculty for the program, draw up a plan

of action (including budget, something that had been forgotten in this year's planning), and present a comprehensive proposal for Explorations I or Explorations II.

Professor Wynne Francis said that an earlier report on the experimental program was "of insufficient substance" for the Academic Priorities Committee; a fuller examination is required before continuation of Explorations can be approved. John Jackson, chairman of the Sociology department, said that experimental programs tend to be "low on experimentation and high on self-perpetuation."

On the new committee will be Asst. Prof. Lloyd Wood, now teaching at Explorations; Asst. Prof. Gabriel Breton; John Macdonald, chairman of the Education department; Assoc. Prof. Robert Carter; and one student from Explorations.
